Software Engineering: Modeling Software Systems using UML

Software Engineering: Implementation and Testing

Software Engineering: Software Design and Project Management

Mar 4, 2024

Rinku

has successfully completed the online, non-credit Specialization

Software Engineering

This specialization covers software engineering methodologies, techniques, and tools for planning, capturing requirements, designing, implementing, testing, and maintaining large-scale software systems. It combines scientific and technological knowledge with many hands-on examples and real-life case studies for students to apply software engineering skills in a realistic development environment. This specialization is for programmers who want to deepen their understanding of the methodologies and techniques involved in software development. Basic object-oriented programming (OOP) concepts are required to attempt the series of courses.

Kenneth Leung

Kenneth Wai-Ting LEUNG, Assistant Professor of Engineering Education, Department of Computer Science and Engineering, HKUST
